Christmas Spectacular 2023

Big Picture Album Kit

To assemble this album, first begin by scoring the spine hinge piece. Adhere strong glue to either the peak or valley side and adhere together to form the page turns. Fold back the outer flaps to secure a flat surface. With strong adhesive, add to the center of the book spine so you have even spacing on top and bottom.

Next, prepare your pages. Step-by-step directions are provided on the next few pages of this booklet. Each page is shown as follows:

❶ Printed book pages are marked in the center so you know the order in which they will be added to your album (i.e. 1, 2, 3 etc.). The measurement indicates the cut size of a patterned paper. Double-sided patterned papers are included in the kit and can be mixed and matched to your liking. Adhere patterned paper in place and then cover with the striped washi tape.

❷ Image shows a detail of the various pieces used to complete the page sample shown.

❸ Image is a midway point showing the placement of the various ephemera pieces with the first few bits.

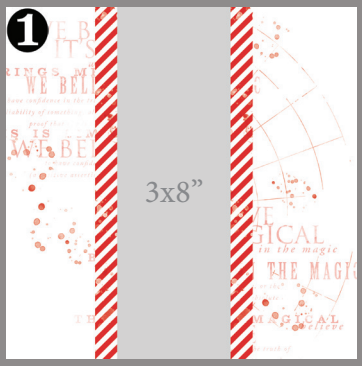

❹ Image of final page. Once pages are complete, adhere to the page turns of album in order. Be sure to leave a slight space from the page turn to the page so pages turn easily. Adhere front and back pages to each other to finish.

Tip - To easily add photos behind the cluster frames, begin with the top image. Trim and glue accordingly. Once glued in place, add the other layers of photos to ensuring proper placement.

Not intended for children.
