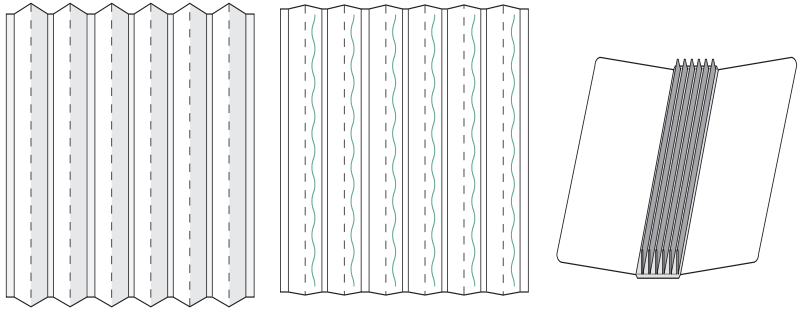
Wherever Big Picture Album Kit

To assemble this album, first begin by scoring the spine hinge piece. Adhere strong adhesive or glue to either the peak or valley side and adhere together to form 6 page turns. Fold back the outer flaps to secure a flat surface. With strong adhesive, add to the center of the book spine so you have even spacing on top and bottom.



Next, adhere the pages in number order (page number can faintly be found in the center of the printed page papers). #1 on the front right side, #2 on the back of #1, so on and so forth. Each page should be adhered to the spine so that the crease in spine is not covered. This will make for easier page turning. Be sure to line front and back pages together.

Images on the following pages show some steps to follow along. You can also scan QR code to bring up the directions on a screen to view in larger format.

Step 1 - Gather Pieces

Step 2 - Add Photos and Frames

Step 3 - Embellish

Step 4 - Final Page

Not intended for children.
